

Name: Peter Asencio
MAS: P: 1 and 2

Date: 8/31/16
Mr. Pate

Discuss IT Topic: If you had the ability to download memories throughout your life to then one-day review them like a photo album, would you do it? These memories have to be kept on the cloud. This means you are connected and your eyesight would be no different than looking through a camera.

Response: I wouldn't download my memories that I have obtained throughout my life. Maybe if I upload all of my memories up on to the cloud all of my personal information would be stolen by a hacker. This is an extremely risky idea you don't know the consequences that comes with altering your mind. I wouldn't want technology interfering with my life physically and mentally. I believe that technology has grown throughout the years but there are some things that should be left alone.
